“INNOVATIVE TEACHING COMPETITION”

Innovative Club conducted an Innovative Teaching Competition on 6th April 2019 at Army Institute of Education, Greater Noida.

It was a wonderful opportunity to think out of the box as we saw creativity exploding through various teaching methods. The judges of the event were Dr. Tania Gupta, Principal AIE, Dr. Babita Bharadwaj, Assistant professor AIE and Dr. Saloni Goel, Assistant professor AIE.

The competition began at around 1500 hours in Section A with an introduction about the importance of innovation and creativity in teaching. The faculty members and students of both the batches attended the competition. After the rules were announced, the competition was declared open.

There were total eight participants from batch 2017-19 who presented various teaching methodologies and innovative practices related to their subject pedagogies. We learnt that using innovative method of teaching is a crucial skill for teachers and education staff. Scientific researches has shown that innovative

teaching methods and approaches can significantly enhance the student learning process. Innovating our teaching strategies is no easy feat because it placed students out of comfort zone, However, experimenting new methods and strategies can improve student engagement, motivation and attainment and is a win-win for both students and teachers. Participants exhibited great oratorical skills. They put in tremendous hard work to display their hidden talent and displayed confidence in presenting their subject matter. Diksha Thapa secured 1st Position, there was a tie between Dhriti Rawat and Babita Rajwar for 2nd position and Ruchi Bhatia secured 3rd position.

The competition concluded on a positive note as all the teachers and the principal gave positive feedbacks to each participant.

It was a great learning experience for all student-teachers as it taught that teaching innovatively does not require that you reinvent the wheel. By committing to listening to your students, providing opportunities for real life learning, fostering creativity and making the material more meaningful to them, one can achieve the implementation of innovative practices in classrooms.

Student- teachers (Batch 2017-19) delivering Innovative Lessons
